## Fired City Council aide alleges that Harris sexually harassed her

The Scattle City Council's only openly gay member is facing down a sexual harassment allegation she says was filed against her by a disgruntled former employee. The female employee, who was fired in January, said yesterday she did not want to comment on the matter. When contacted a second time, the woman said questions posed by the Post-Intel-

ligencer bordered on harassment.
The woman was a part-time aide to Councilwoman Sherry Harris. who confirmed that an allegation of misconduct had been filed against her with the city's Ethics and Election Commission.
Carolyn Van Noy, the commission's executive director, said she was bound by confidentiality rules not to discuss the matter, or even to acknowledge that her office was investigating a complaint

against Harris.

Harris said that shortly before she fired the 29-year-old woman because of poor work habits, the aide told her that if she let her go ould file a complaint ing sexual harassment and racial

Both Harris and the former

aide are black.

Harris said the accusation is ridiculous: "It's absurd and the facts will speak for themselves."

elevations and get ready to leave their homes. A flood on the Skokomish, if it occurs, would be the third on the river since late December, when rain and warm temperatures melt-ed mountain snow, swelling the river to three feet above flood stage and forcing 125 people to evacuate their homes. Several other families also evacuated their homes when the river flooded Feb. 1. It is getting to be an old and tired story in the waterlogged area.

work torce is reduced.

Westinghouse spokesman
Kuhlman said some overhead and
support costs — such as fire
protection and security — are
unavoidable.

# Bridges: Risk of collapse in quake

Add 2,400 miles of county roads and you come up with 196 bridges that county government has to maintain. About two-thirds of these bridges were built before

bridges that would be in danger of collapsing if they were within 18 miles of a quake of up to 7.5 magnitude. The recent earth-quake in Kobe, Japan was a magnitude of 7.2.

The same report recommends

has to maintain About two-thirds of these bridges were built before 1960.

The county's concern with these bridges is twofold "Typically, what we are worried about in bridges is a vertical load." Ringen said, "but with sessmic (earthquake) concerns we are worried about lateral load meaning improvement) sideways.

Also, he and other engineers said, it wasn't until the last 15 to 20 years that bridges were built with earthquakes in mind.

According to a County somethy and the statement of the supports during an earthquake with earthquakes in mind.

According to a County somethy and the supports during an earthquake staff report, there are 107 counts.

bridges are simply getting old they show it in rotting support timbers, corroded steel and cracked concrete.

A large portion of the county's 102 timbered bridges were built between 1950 and 1960. Timothy Lane, a senior bridge engineer to the control of the county's 102 timbered bridges were built between 1950 and 1960. Timothy Lane, a senior bridge engineer to the county of th

compromise the successful com-pletion of prosecution."

Sidran said Labor and Indus-ries had not received all the training records it had sought because the agency's request was misinterpreted. He said records of the firefighters who died or were injured were provided im-mediately.

Labor and Industries actually had asked for training records of each of the 100 firefighters who fought the blaze, and Sidran said

fought the blaze, and Sidran said

fought the blaze, and Storan said the request was now being met. State investigators served a subpoena on the Scattle Fire Department for records and tapes on Jan. 10 — the day before the city held a memorial service for the four firefighters who were killed.

killed
"I don't know why L&I thought
that was necessary." Deputy Mayor Bruce Brooks said.
In a Feb 9 letter, Sidran
explained to Labor and Industries
that various tapes will be withheld because police feel the release would impair their ability to
interrigate a suspect. The tapes,
he explained, contain information
that includes that an information of the its and the condition of the building.

On Tuesday, the state agency responded with a new request for

records of all three-alarm fires involving the Seattle Fire Department since June, inspections and various safety officer records. Brown said his department hopes to complete its investigation by the end of March. Sidran said there is no reason to hurry.

to hurry.
"L&I. in due course, will have

access to everything to do its job. Sidran said.

access to everything to do its job. Sidran said.

City Councilwoman Margaret Pageler, who chairs the council's public safety committee, expressed concern over the apparent loggerheads between Labor and Industries and the ety.

We don't want to get involved in a dispute that may be about personalities or past history. Pageler said. "But we want to learn from this fire or any fire so we can do a better job of protecting our firefighters in the next fire.

Pageler to be fireful to the protection of the protection

or agencies.

An internal investigation already is under way and the department has sought a review of the fire by the National Fire Protection Association and the federal National Fire Administration.

# King County officials are keeping relose eye on the Cedar Rear especially near its mouth at Renton. The Snoqualme was also a concern, along with the Tolt, Green, and White rivers and Issaquah Creek. If flooding looks likely, the county's Department of Public Works will activate its Flood Warning Center in Renton Activated, citzens can call 286-8200 to receive recorded flood information. Mason County officials were advising Skokomish River valley residents to sandbag their property, move belongings to higher elevations and get ready to leave their homes.

within a few yards of his small wood home within a few yards of his small wood home with a few yards of his small wood from work and I'm waiting now for my wife to get home We might get out of here tonight — maybe get a hotel in Shelton.

Beverly Godwin has lived in he valley all of her 60 years and said this is the wettest winter she can ever recall.

"I've seen water going into houses, about four inches deep I've seen cars with water up to the windows." Godwin said.

"Sands bags aren't the answer." she said. "We're going have to dredge the river of gravel to make it deeper. That's the only way."
